Subject: City Hall Digital Display

Ashton,

I explained to Jason that after surveying the existing digital signs that it makes more sense to replace with new units. There is damage to the LED's on the faces & the communication network components & main board need replaced/updated.

New signs will be RGB full-color units instead of just red. Also the communication will be cell-based with no network to go down or need maintained. You can program the signs from anywhere you have wifi in the world. See attached estimate to

replace with comparable sized signs. Just give me a call or reply with any questions you may have. Thanks.
